Security-conscious Software Engineer with experience in data integration, secure authentication, and API security. Adept at working with ERP and HCM system integrations, OAuth authentication mechanisms, and Linux-based security tools. Passionate about cybersecurity, vulnerability analysis, and secure system design.

TECHNICAL SKILLS

Programming & Scripting:	Javascript, SQL, Python, Java, REST APIs, Bash, HTML/CSS, C
Development Frameworks:	Next.js, Django, Spring Boot
Kernels & OS:	Linux, Gnu/Linux, Ubuntu, Kali Linux, Windows NT, Windows
Cybersecurity Tools:	Wireshark, Burp Suite, Metasploit, Aircrack-ng, Kali Linux
Data Integration & ETL:	Workday Adaptive Planning, Workday HCM, Pentaho
Security Authentication:	OAuth, API Security, Authentication Mechanisms. Linux Security
DevOps & Deployment:	Docker, VPS, Self-hosted CRM, Cloud Services
Other Technologies:	Google OAuth, Open-source CRM (ESPOCRM), Power BI

WORK EXPERIENCE

Junior Software Engineer

Nov 2023

CosmoSynergyCloudTechnologies Pvt. Ltd.

Hyderabad, TS

- Developed secure API integrations for Workday Adaptive Planning using **Custom Cloud Data Source (CCDS)**.
- Researched and implemented **authentication security mechanisms** (OAuth, API tokens) for ERP system integrations.
- Troubleshoot and optimized **secure data exchange** between Workday Adaptive and third-party ERP/HCM systems.
- Built a secure **OAuth 1.0a** authentication service using **Spring Boot and Docker** to bypass system constraints.
- Configured and deployed an **open-source CRM (ESPOCRM) on a self-hosted VPS**, ensuring data privacy and security.

PROJECTS

- **Workday Adaptive Power BI Integration:** Engineered a secure data pipeline using Google Sheets as middle-ware for **data security compliance**.
- **OAuth 1.0a Authentication Web Service:** Developed and deployed a **secure authentication microservice** using Java Spring Boot.

CYBERSECURITY RESEARCH

- Published technical blogs on **Zero-Day Vulnerabilities, Encryption, and Ethical Hacking**
My blog: <https://tech-beinghumancult.blogspot.com/>
- Hands-on experience with **penetration testing tools**: Wireshark, Burp Suite, and Aircrack-ng.
- Explored **self-hosted cloud security** while implementing an open-source CRM system.

EDUCATION

Bachelor of Technology:

Electronics and Communications Engineering, CVR College Of Engineering

2019 - 2023
